

THE RENAISSANCE *Design Advantage*

Our one-piece basket is exclusively attached without the use of rivets, a common area of failure on other plastic cart designs

High visibility basket provides cashier with clear vision to view all items in the basket thus reducing theft

Contemporary contoured basket design reduces the collection of moisture and dirt, reducing slip-and-fall potential and provides the customer with a clean shopping cart

Modular design allows for easy maintenance

Unique steel gate design eliminates gate from dislodging from basket

Logo Panel

Heavy-gauge oval tube frame

Fixed lower grill eliminates chatter

Steel components include Tech-Seal finish (three-year written warranty against the spread of corrosion)

- Basket is molded of FDA-approved resin
- Colored baskets available to meet your store decor requirements
- Three store logo panels located on basket (logo panels on sides and front)

- 10½" nesting distance offers a better utilization of front end space
- Freight optimization: 53' trailer will accommodate approximately 550 carts. This will represent a greater freight savings

Unity of Design and Function

Options

- Cup Holder
- Basket Divider
- Rear Caster Lift - Raises rear fixed casters, reducing wheel flat spotting

Injection Molding

The Renaissance cart was designed using the latest sophisticated computer technology to identify stress points and simulate years of service.
